Henry Aronofsky

Student at Harvard University | Boston, Massachusetts
henryaronofsky@gmail.com | linkedin.com/in/haronofsky | henryaronofsky.github.io/index.html

Education

Harvard College Expected graduation: May 2028
Bachelor of Science in Mechanical Engineering (accredited) GPA: 3.9/4.0

Experience

Divergent 3D | Q&A Engineering Intern May 2026 - September 2026

- Work with material and Q&A engineers to develop innovative inspection solutions to streamline metal 3D printing.
- Build a full-stack web application that can interface with printer data output and display relevant information to operators.

Harvard Microrobotics Laboratory (Ocean Shot) | Engineering Research August 2025 - Present

- Design and test a deep-sea electromagnetic biopsy sampler to be used in the field on jellyfish at depths exceeding 1000 meters.
- Fabricate gantry systems, 3D print and laser cut bracket supports, build charging and discharging circuits to control probe.

Harvard Radcliffe Dramatics Club | Sound Engineer/Sound Designer August 2024 - Present

- Plan and execute immersive soundscapes for large-scale musical theater productions.
- Load in, maintain, and fix speaker systems across Harvard's three historic live theater venues.

Nanotronics | Design Engineering Intern May 2021 - September 2023

- Work with designers and engineers to improve factory efficiency through data visualisation tools.
- Develop ways of increasing factory throughput and increasing operator training speed.

Projects

EuroRackingIt | Personal Project

- Design and build a fully analog 12-note synthesizer.
- Implement Schmitt trigger oscillators, temperature feedback loops, and waveform converters to make a fully functional musical device.

BumbleBee | Class Project

- Design a 4WD, gearbox and servo actuated robot that can translate in three dimensions and interact with various objects.
- Use turning (lathe), 3D printing, laser cutting, CNC milling, drill press, and saws to build parts.

Classic Car Maintenance | Summer Work

- Rebuild carburetors, replace coolant hoses and redesign electrical systems on a 1951 Pontiac, a 1972 Ford, and a 1979 Jaguar.

Interests

Jazz, double bass, musical theater, board games, sailing
